Project Link: <https://github.com/jasmine1711/AETHER/tree/main>

AETHER – Your Digital Wardrobe is a full-stack e-commerce application for clothing, offering a responsive design, secure authentication, and shopping cart with payment integration. The platform features a dynamic product catalog curated by vintage and pop-culture themes, along with an AI-powered assistant and chatbot that provides personalized outfit recommendations based on body type and style preferences. Development workflows followed standard best practices to ensure reliability and scalability.

### Virtual Bookstore

Mentor: Individually Designed

Key Skills: Java Thyme Leaf Maven H2 Spring Boot Spring MVC Spring Security

Project Link: [https://github.com/jasmine1711/Virtual\\_Bookstore](https://github.com/jasmine1711/Virtual_Bookstore)

The Virtual Bookstore is a full-featured e-commerce web application developed using the Spring framework. Traditional bookstores face limitations in accessibility and inventory. This project addresses those needs by creating a user-friendly virtual platform that provides both a wide selection and a curated, engaging shopping experience.

The goal is to provide a seamless digital space for users to explore, search, select, and purchase books securely.
